nothing right now. dwr sent us the update to the methods papers for review. i provided comments. mike finan is out until the end of next week. i don't think dwr will request our approval or corps's w/o mike finan reviewing the draft and giving the thumbs up. similarly, if paul returns before this happens he should give the informal okay on what they have done as well (which he basically has already done given dwr update the methods papers with what we discussed at our last meeting. and they did that). after that happens, dwr will send hard copy letters to epa and coprs requesting approval of the jd method. then we can reply using paul's draft. i verified this with jean and gail (staff at dwr working on the jd).

Sounds good. Btw, what needs to happen with the ltr to dwr on approving jd method?

had a few more comments from others. new version attached.

not sure if or how we should include this but we might think about highlighting the work Paul Jones has done with DWR on the CWA JD method. That is a pretty big deal in my mind. It shows progress and successful collaboration at the staff level and hopefully success as the next level when DWR asks for and we and the Corps provide approval of their proposed CWA JD method. we could get more room on the two-pager by nixing the endnotes.

Re: BDCP paper

Hi Karen,

I updated the document with your recommendations. I didn't use track changes just did my best to address your comments. 408 is part of Rivers and Harbors Act, so that is why it is written that way. Check out very last paragraph heading. Wanted to take out CFR text in the heading and be more direct. Could be, that I was too direct.

(See attached file: Update and Summary 072711.docx)

Thanks for doing this Erin. I think this will be useful for others (Alexis, Jared, Gorke, Nawi, Letty) as well as those in-the-know re: 404. So I tried to streamline and simplify a bit with that in mind. See what you think. Thanks!
